December 31, 2025

Dr. Yuval Tabach
The Hebrew University of Jerusalem
Mount Scopus Campus
Jerusalem, Jerusalem 9190501
Israel

Dear Dr. Tabach,

Congratulations! Your recent grant application was approved recently by our Medical Advisory Council for \$50,000 USD (159,344.25 New Israeli Shekels). It is for “Uncovering and Exploiting Tumor Vulnerabilities in Medulloblastoma via Integrated Genomic and Preclinical Platforms.” *Please be aware that all wire funds are reconciled against USD and this may change the end result of the transfer.*

In receipt of this grant letter, please send written agreement to the following within 14 days so that we may process payment:

- A letter indicating receipt of the grant that we may post on our website as a reference that such a grant has been made. It should specify the amount.
- Confirmation that the study/protocol will begin within 6 months of the award date. If review panel approval has not yet been achieved, monies will be withheld by The Cure Starts Now up to 6 months from award date while approval is developed. After 6 months, grant monies may be reallocated by the Medical Advisory Council and this grant approval shall be void.
- Confirmation of IRB approval.
- Confirmation that the results and progress of the funded study will be used in a collaborative manner with other institutions that can further the progress of brain cancer research, inclusive of involvement by other participating institutions in the DIPG/DMG Collaborative.
- Contact information for the lead researcher to allow a member of our Board of Directors or Medical Advisory Council to contact and/or visit for 6-month progress reports back to the Medical Advisory Council of The Cure Starts Now.
- A web page link to a site with more information about the protocol and how to enroll in the program for patients that visit www.thecurestartsnow.org and www.dipgcollaborative.org looking for more information.
- Confirmation that in all future publications, published data, presentations, web pages, blogs or other references to the grant and supporters; The Cure Starts Now Foundation and Snapgrant.com are identified. Failure to provide all organizational references may result in future funding denials and could be grounds for grant recall.

- Please be aware per the grant request application, an annual report is required 12 months from receipt of the grant at least by the end of each calendar year for the length of the grant
- As a grant recipient, the Principal Investigator will be required to attend and present any updates at the next DIPG/DMG Symposium in 2027. Additional details will follow 6-months prior to the conference.

Once again, thank you for your continued diligence in this battle and your continued partnership in helping our children!

Sincerely,

Keith Desserich
